12
 months
 WARRANTY

Load Resistor.	12V
Resistance.	8 Ohms
Barcode.	9333938001766

These resistors can be connected across the turn signal bulb to simulate the load of a regular filament bulb. This will solve LED related turn signal problems such as hyper flashing, no flashing or burnt out bulb indications. One resistor is required for each turn signal bulb.

Load Resistor.	24V
Resistance.	34 Ohms
Barcode.	9333938001773

warning

Load resistors gets very hot!
 Keep clear of plastic or flammable surfaces.

installation

Using splice taps, connect one wire to ground and the other wire to the turn/brake wire. You don't have to cut your car's wiring. Squeeze splice taps with pliers. One Load Resistor required for each turn signal bulb.
